PROFILE SUMMARY

A Web Developer who help businesses solve problems through code and software development. I have worked on freelance projects and recently completed my first major client job. I enjoy creating clean, user-friendly interfaces and building practical web solution to help businesses grow.

PROJECTS

- **FREELANCE - WEB DEVELOPER**
Real Estate Agency (Eaglespoint), Lagos
March 2025 -June 2025
 - Designed and developed the core features of the web application tailored for mid-sized real estate agencies.
 - Collaborated with the staff of the company for feedbacks and to gather requirements and iteratively improved the platform if needed.
 - Handled all backend logic and database design, integrating user authentication, listing management, and dashboard metrics.
 - Implemented a functional admin dashboard to manage agents and property listings internally.
 - Managed everything on the project by myself. It was my first major client project

- **BACKEND DEVELOPER**

- **SkedlEase – Medical Appointment Application (School Project)**

- April 2025*

- Developed RESTful APIs using **Django Rest Framework** for managing appointments, users and schedules.
 - Collaborated closely with mobile and desktop frontend team members to ensure smooth API integration.
 - Learnt how to document APIs using Postman.
