Insight SFI RESEARCH CENTRE FOR DATA ANALYTICS

H2020 project — Prêt-à-LLOD

A World Leading SFI Research Centre — Science Foundation Ireland For what's next

What? Open access Web-based platform for Language Resource (LRs) and services discovery - refactoring of Linghub

Includes: User-friendly, robust, quality tests, conversions to standards, many ways to explore and search the data, extended data
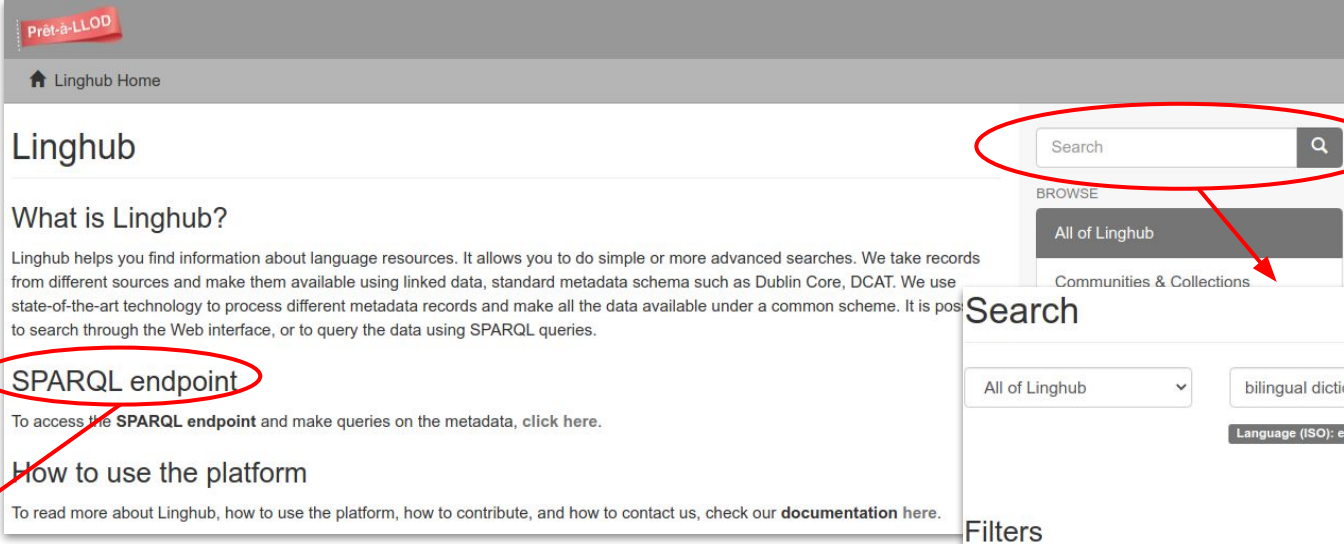

Based on: DSPACE
open source data management software

SPARQL queries capability

Apache Jena Fuseki

Linked data based metadata

LRs from:
Lin|gu|is|tik PORTAL FÜR SPRACHWISSENSCHAFT
OPEN LANGUAGE ARCHIVES
CLARIN ERIC — Common Language Resources and Technology Infrastructure
EUROPEAN LANGUAGE RESOURCES ASSOCIATION — ELRA
META-SHARE
datahub The easy way to get, use and share data
Teanga

Linghub

What is Linghub?

Linghub helps you find information about language resources. It allows you to do simple or more advanced searches. We take records from different sources and make them available using linked data, standard metadata schema such as Dublin Core, DCAT. We use state-of-the-art technology to process different metadata records and make all the data available under a common scheme. It is possible to search through the Web interface, or to query the data using SPARQL queries.

SPARQL endpoint

To access the **SPARQL endpoint** and make queries on the metadata, **click here.**

How to use the platform

To read more about Linghub, how to use the platform, how to contribute, and how to contact us, check our **documentation here.**
