Introduction

Introduction

The screenshot shows the EUR-Lex website. At the top left is the EUR-Lex logo with the tagline 'Access to European Union law'. Below it is a navigation bar with a 'MENU' button, a 'QUICK SEARCH' input field, and links for 'Search tips' and 'Need more search'. A breadcrumb trail reads 'EUROPA > EUR-Lex home > About EUR-Lex'. The main content area is titled 'About EUR-Lex' and contains three sections: 'What is EUR-Lex?' (describing it as an online gateway to EU law), 'Who runs EUR-Lex?' (stating it is run by the Publications Office of the European Union), and 'What can you find on EUR-Lex?' (listing treaties, legal acts, and preparatory documents).

About EUR-Lex

What is EUR-Lex?

EUR-Lex is your online gateway to EU Law. It provides the official and most comprehensive access to EU legal documents. It is available in all of the EU's 24 official languages and is updated daily.

Who runs EUR-Lex?

EUR-Lex is run by the [Publications Office of the European Union](#).

What can you find on EUR-Lex?

You can access the following EU legal documents:

- Treaties
- Legal acts from EU institutions
- Preparatory documents related to EU legislation

- **Around 24k** regulatory documents for the year 2022
- **15%** are legislative documents
 - They comprise regulations, directives, decisions, and opinions

COMMISSION DELEGATED REGULATION (EU) No 626/2011

of 4 May 2011

supplementing Directive 2010/30/EU of the European Parliament and of the Council with regard to energy labelling of air conditioners

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Directive 2010/30/EU of 19 May 2010 of the European Parliament and of the Council on the indication by labelling and standard product information of the consumption of energy and other resources energy-related products ⁽¹⁾, and in particular Article 10 thereof,

Whereas:

- (1) Directive 2010/30/EU requires the Commission to adopt delegated acts as regards the labelling of energy-related products representing significant potential for energy savings and having a wide disparity in performance levels with equivalent functionality.
- (2) Provisions for the energy labelling of air conditioners were established by Commission Directive 2002/31/EC of 22 March 2002 implementing Council Directive 92/75/EEC with regard to energy labelling of household air-conditioners ⁽²⁾. The implementing Directive establishes different labelling scales for air conditioners using different technologies and the determination of energy efficiency is based on full load operation only.

Commission Delegated Regulation (EU) 626/2011 with regard to energy labelling of air conditioners

Article 2

Definitions

In addition to the definitions set out in Article 2 of Directive 2010/30/EU of the European Parliament and of the Council ⁽⁵⁾, the following definitions shall apply:

(1) ‘*air conditioner*’ means a device capable of cooling or heating, or both, indoor air, using a vapour compression cycle driven by an electric compressor, including air conditioners that provide additional functionalities such as dehumidification, air-purification, ventilation or supplemental air-heating by means of electric resistance heating and appliances that may use water (either condensate water that is formed on the evaporator side or externally added water) for evaporation on the condensor, provided that the device is also able to function without the use of additional water, using air only;

(2) ‘*double duct air conditioner*’ means an air conditioner in which, during cooling or heating, the condensor or evaporator intake air is introduced from the outdoor

Commission Delegated Regulation (EU) 626/2011 with regard to energy labelling of air conditioners

Introduction

- As per Joint Practical Guide (JPG) of European Parliament (*European Commission and Legal service, 2015*)
 - Terminology be consistent
 - Terms used in the act are defined together

Introduction

- As per Joint Practical Guide (JPG) of European Parliament (*European Commission and Legal service, 2015*)
 - Terminology be consistent
 - Terms used in the act are defined together
- On average, **20 definitions** are present in each legal act for the Energy domain

Contribution

- LexDrafter framework **assists in terminology drafting** (*Definitions articles*)
 - Extracts definitions from documents
 - Generates definitions based on contextual information

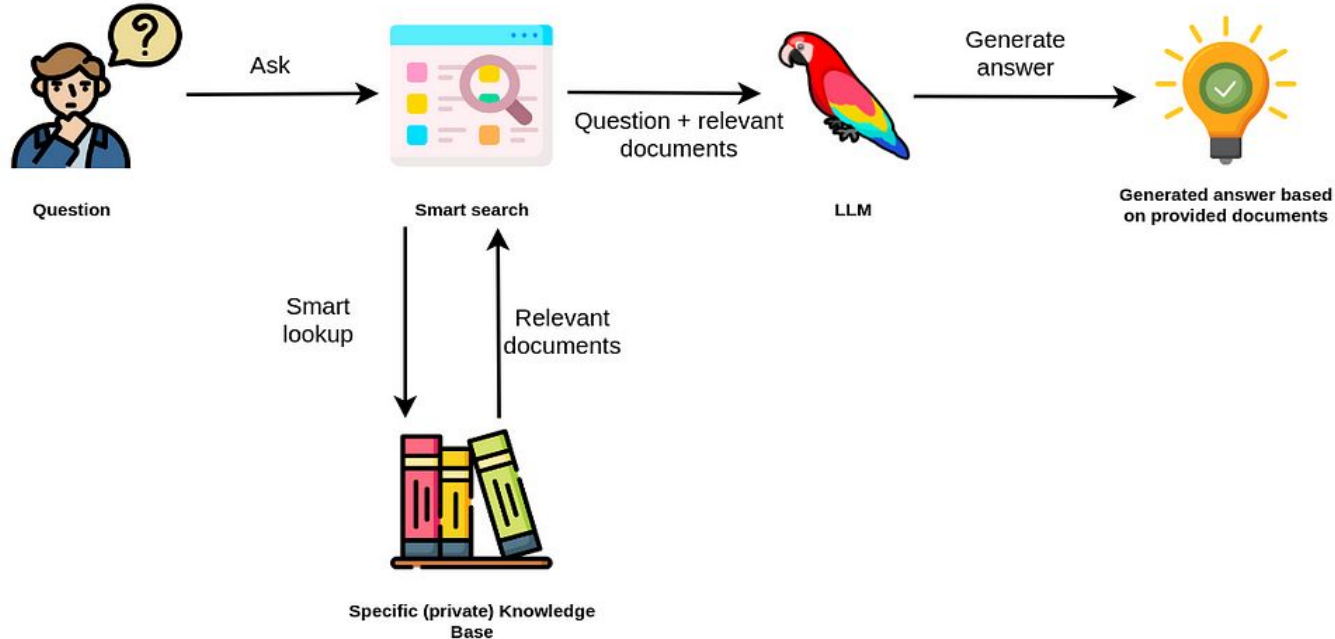

Contribution

- LexDrafter framework **assists in terminology drafting** (*Definitions articles*)
 - Extracts definitions from documents
 - Generates definitions based on contextual information
- Advantages of LexDrafter
 - Harmonizing legal definitions
 - Human errors are reduced by pointing to existing term definitions
 - Less time spent on ensuring term definitions consistency

LexDrafter Framework: Workflow 1/4

LexDrafter Framework: Workflow 2

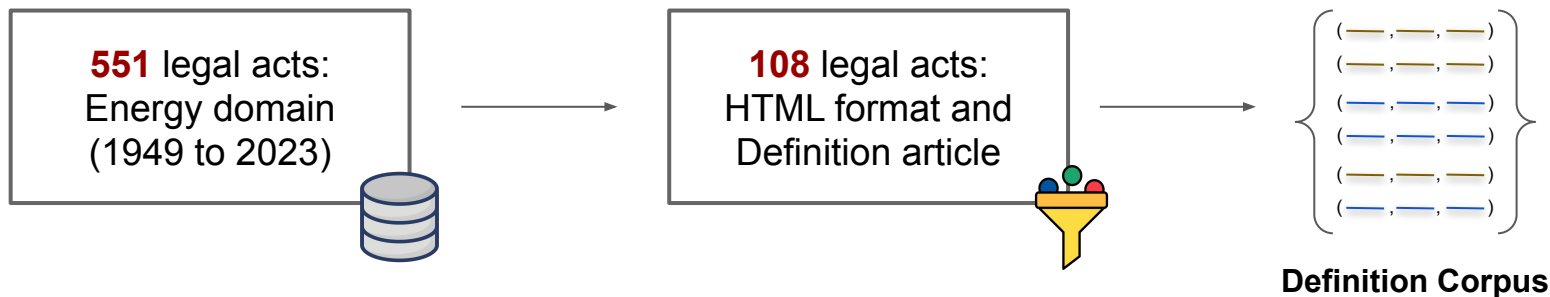

LexDrafter Framework: Workflow 2/2

Experiments

Experiments

Objective:

- Evaluate for the definition generation task
 - Lexical similarity (BLEU)
 - Semantic similarity (BERTScore and BLEURT)

1007 legal terms

- 787: one definition
- 220: multiple definitions

1330 definitions

Experiments

Metrics		LLaMA-2 (7B)	Vicuna (7B)
BLEU	BLEU-1	0.25	0.28
	BLEU-2	0.13	0.15
	BLEU-3	0.07	0.09
	BLEU-4	0.04	0.05
BERTScore (F1-score)		0.82	0.82
BLEURT		0.47	0.47

Interpretation:

- **Lower BLEU scores** due to different styling and vocabulary
- Semantically similar generated definitions (**higher BERTScore**)
- **Lower BLEURT scores** due to non-legal domain corpus training

Conclusion and Future Work

Conclusion and Future Work

Conclusion:

- LexDrafter framework assists in terminology drafting for legal acts
 - Application of RAG
 - Harmonize legal definitions
 - Extracts definitions from documents
 - Generates definitions based on contextual information

Future Work:

- Automatically identify terms to be defined
- Investigate legal acts from all 20 domains (for example: Agriculture, Taxation, External relations, and many more)
