

DESCRIPTION AND DATA

This ZEHNDER HX-2200 digital HD satellite receiver is an easy-to-use receiver for receiving all free TV and radio channels via satellite, including Full HDTV broadcasts in 1080p. By connecting an external hard drive or USB memory stick, the device turns into a media station for playing movies, photos and music or recording TV programs. USB memory (external hard drive or flash drive) is not included. With an external 12V power supply, the receiver is also ideal for camping. A remote control with batteries is included.
