UNIVERSAL SERIAL BUS

EPG

This ZEHNDER HX-2300 VFD digital satellite receiver is for receiving digital and free-to-air TV and radio programs. It is suitable for use in both single-user and multi-user systems with star or single-cable distribution of the latest technology. The integrated alphanumeric VFD display offers you clear convenience and shows the channel name on the display. Numerous connections are available on the device: a USB 2.0 port, a digital audio output (COAXIAL), a Scart connection, and an HDMI connection. Optionally, a WiFi antenna can be connected via the USB port. The device also has a mechanical power switch and a permanently installed power cable. By connecting an external hard drive or a USB stick, the device becomes a multimedia station for playing movies, pictures, and music, or for recording your TV programs. A USB storage medium (external hard drive or USB stick) is not included. A learnable remote control is included to control your TV set.
